BIOINFORMATICS
RESOURCE CENTER

Responsible Use of AI

Two courses in November 2026 · choose your track

Two tracks, depending on your prior coding experience.
There is a good degree of overlap, but the coders' course assumes you are a somewhat seasoned bioinformatician tackling more advanced problems with coding assistants.

TRACK 1 · NO CODING REQUIRED

Responsible use of AI for non-coders

Tue 10 Nov · 12:30–4:30 pm

- How LLMs work
- What happens to your query
- Protecting your data
- Where AI helps and fails
- Fitting AI into your workflow
- Customizing your LLM

TRACK 2 · FOR CODERS

Responsible, Reproducible and Robust Bioinformatics with AI Agents

Thu 12 Nov · 9:30–4:30 pm

- Advanced problems with agents
- Reproducible workflows
- Adversarial Review
- Providing extra context with RAG and MCP servers
